

Examples of workshops with successful programs:

The workshops have been ordered with respect to topics. Note however, that many of them actually cover several fields:

Informatics

[Gossip-based Computer Networking](#)

[Kernelization](#)

[Analysis and Visualization of Moving Objects](#)

Mathematics

[Numeration](#) [two weeks, workshop preceded by a school]

[Extreme Value Statistics in Mathematics, Physics and Beyond](#)

[Coherent structures in evolutionary equations](#)

Astronomy

[Modeling and Observing Dense Stellar Systems](#)

Physics

[Flow of Foams](#)

[Coherent structures in evolutionary equations](#)

[Dynamical heterogeneities in glasses, colloids and granular media](#) [two weeks]

With Humanities/Social sciences

[Context, causes and consequences of conflict](#)

[Creativity: Meaning, Mechanisms, Models](#)

Life Sciences

[Assembling a Multi-Cellular Circadian Pacemaker](#)

[Circulating tumor cell isolation and diagnostics](#)

[Analysis and Visualization of Moving Objects](#)

Computational

[Analysis and Visualization of Moving Objects](#)

[Modeling and Observing Dense Stellar Systems](#)
